

**West Virginia Water Science Center (WVWSC)
Health and Safety Plan (HASP) for Hazardous Waste Cleanup
Prepared (04/14/2014)**

Note that the HASP plan for the WVWSC is simplified as follows: In case of any spill other than a minor spill, the premises will be evacuated and the HAZMAT team of the Charleston Fire Department will be called (911) to take charge of and direct all hazardous waste cleanup. The Charleston Fire Department will take full control of the situation and will implement its own HASP plan. See the WVWSC Spill Response Plan for details on spills and evacuation and call-for-assistance procedures. The chance of a major spill occurring is highly unlikely, due to the limited storage of chemicals, especially hazardous chemicals, at the WVWSC. Minor spills will be addressed as described in the WVWSC Spill Response Plan.
